

EDR-1 ELECTRONIC DRUM RACK

Stylish, compact and lightweight rack, exclusively designed for the DRUM-X. Includes five (5) pcs of the PC-2 Pipe Clamps and one (1) pc of the Tone Unit Holder.

MAT-5 SETTING MAT

Helps prevent BP-1 Bass Drum Pad from creeping.

TUR-1 TONE UNIT RACK

The 19-inch E.I.A. International Standard Rack mounts up to seven (7) units including the Tone Unit (TU-1).

TOM HOLDERS

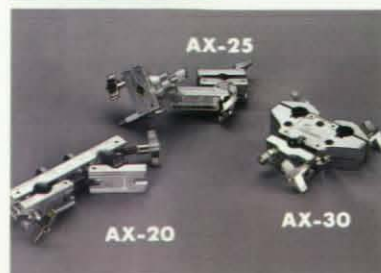

TWIN TOM STANDS

Both the T-950W and T-800 tom arms have a $\frac{7}{8}$ " pipe diameter. DRUM-X's conventional set-up requires two (2) pcs of either stand (refer to picture on p. 2).

The TH-95 and TH-80 arms have long shafts, while the TH-95S and TH-80S are shorter. Pearl's TP-1 Snare Drum/Tom Tom pads can be secured by either model or length and all fit any of Pearl's three adaptors.

ADAPTORS

Three choices of Pearl Adaptors are available, depending on your kit set-up. AX-20 two-hole adaptor can clamp any pipe from $\frac{5}{8}$ " to $1\frac{1}{8}$ " diameter. AX-25, an expanded version of the AX-20, has two 360° revolving clamp sections. AX-30 is a three-hole adaptor, two holes for up to $\frac{7}{8}$ " diameter pipes and one adjustable from $\frac{5}{8}$ " to $1\frac{1}{8}$ ".

DRUM-X

PROGRAMMABLE ELECTRONIC DRUM

PEARL

DRUM-X PROGRAMMABLE ELECTRONIC DRUM

"DRUM-X" is a new type of programmable electronic drum capable of producing a wide variety of drum sounds from acoustic to today's most requested electronic drum sounds. A natural rebound gives you a real acoustic drum feel, from delicate sticking to the heaviest back beat. The "DRUM-X" is the best of all worlds...acoustic sounds and feel plus electronic sounds...all programmable with one switching operation.

DRUM-X
 TU-1 Tone Unit
 TP-1 Snare Drum/Tom Tom Pads (4 pcs)
 BP-1 Bass Drum Pad
 CC-60 Connecting Cords (6 pcs)

Stands and Tone Unit Rack not included

TONE UNIT

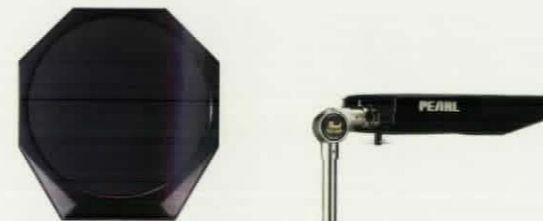

- Eight (8) Parameters provide a wide variety of sounds from acoustic to today's most desired electronic drum sounds.
- Volume, Color, Pitch and Bend change in proportion to the strength of the attack on each pad, giving you "real" acoustic drum sounds and feel.
- Eight (8) complete sets (kits) of sound can be programmed and recalled by one touch operation. Each kit is composed of five (5) pads and their respective sounds. By switching the kit number, the sound of all five (5) pads is simultaneously changed.
- Programming and modifying each pad's sound within each of the 8 possible kits is quick and easy.
- A Separate-Out Pad Jack enables you to apply effects to the desired pad (s). By using the Independent Pad Output (Separate Out), Line Input and Mix Output (Mono and Stereo) and eliminating the mixer, additional effects can be applied to any one sound source.
- With the use of headphones, the DRUM-X can be used for quiet "in-home" practicing.
- TU-1 Tone Unit can be mounted in the 19-inch TUR-1 rack.

SNARE DRUM/TOM TOM PAD (PAT. PEND.)

- Surface of the Snare Drum/Tom Tom pads is made of a double layer of rubber, consisting of one hard (top) and one soft (bottom), to attain a natural stick rebound plus provide a smoother hand impact regardless of the degree of your sticking attacks.
- As with all Pearl drums, Snare Drum/Tom Tom pads are equipped to accept Pearl's standard tom holder pipes (7/8" diameter) with a memory "Stop-Lock" to insure proper positioning and stability of all the pads.

BASS DRUM PAD

- Bass drum pad provides the feel of a real bass drum due to the "natural" movement of the surface area where the beater strikes.

DRUM-X EXAMPLE SET-UP
