

Export SX QUARTZ

B-850 C-850 H-850 S-850

Pearl's 850 Series hardware is the strongest single brace leg professional hardware on the market. The series features fully adjustable wide based cymbal stand tripods, large rubber tipped feet and nylon bushing system at all pipe joints. The C-850 and B-850 cymbal stands are perfectly balanced with a low center of gravity, wide stance tripod, and feature the uni-lock cymbal adjustment system.

The H-850N Hi-hat stand provides full spring tension adjustability, precision chain pull action and its single braced leg tripod swivels a full 360° for easy placement.

Pearl's S-850 snare stand features an ultra-low center of gravity for excellent weight distribution, sturdy single braced legs, rubber tipped "easy grip" basket system, and the uni-lock angle adjustment system for precise snare drum placement.

When the desire to expand your five piece Export SX kit strikes, the best way to begin is with the ESX-2810 add on power tom set. The ESX-2810 power tom set features an 8" x 8" tom and a 10" x 10" tom. Both of these drums are suspended on a T-850 double tom stand. The stand is comprised of a single-braced leg tripod, sturdy upper and lower stand tubing, stop locks for permanent positioning of the AX-30 three hole adapter, and two TH-85S tom arms with internal ratchet assembly for strength and tom adjustability. Convert your five piece set into a seven piece kit in minutes with the professionally styled ESX-2810 add on power tom set.

Pearl's Quarter Toms are the perfect add on accessory to any of our drum sets. The toms provide a melodic upper range pitch useful in a variety of playing situations.

Quarter Toms are made of heavy gauge aluminum, beautifully lacquered adding a stunning visual statement to any set configuration. They are also excellent for triggering outside electronic sound sources. They come in three different sets complete with the T-850W twin tom stand and are available in both Artic White and Piano Black Lacquer finishes.

The new Export SX ESX-614D snare drum was designed exclusively for the SX series. The three distinctive professional features of this drum are its outstanding mirror chrome finish and smooth design reminiscent of the Free Floating System snare shell, specially designed bearing edges for stunning attack and response, and a Remo coated Ambassador batter head. The ESX-614D Export SX snare drum is an exciting addition to our professional snare drum line.

#75 BLUE QUARTZ

#77 BLACK QUARTZ

#80 PURPLE QUARTZ

ESX-22DW-9 IN BLACK QUARTZ

ESX-22D-5 IN PURPLE QUARTZ

Take a closer look at the new Export SX. Immediately noticeable is its unique finish. This patented process designed and produced exclusively by Pearl is available in three distinctive colors: Black Quartz, Blue Quartz, and Purple Quartz. The Quartz finish has been developed with stage lighting in mind. The finish actually changes color in reaction to various stage illumination techniques.

The new Export SX kits feature Remo pinstripe batter heads and clear bottom heads. This head combination is the most widely used by today's top professionals in all musical styles. Together the two allow the drum to resonate to its fullest and offer unequalled attack, depth, and warmth.

One of the most important features on all Export sets, including the new SX, is its interior ply of 100% birch. This fine wood has long been the choice of studio engineers for its favorable tonal colorings. The interior lining on all Pearl Export drums feature horizontal grain for drum strength, stability, and durability. Other manufacturers try to cut costs and choose to run the grain vertically making the delicate bearing edges susceptible to chipping and fraying. This is further complicated by the usage of several pieces of wood to create the inner ply. Pearl shells are always one piece per ply.

Pearl's Export series has been designed and engineered to be the best drum set in its category and has grown to become the largest selling drum set in the world. The new Export SX adds prestige to excellence.

ESX-22D-7 IN BLUE QUARTZ

Export "SX"

Year after year Pearl enhances the character of the Export Series by upgrading the finest details for this line. Export drums now feature birch lined shells, the P-780 chain drive pedal, fully telescopic 730M convertible spike/rubber tipped spurs, high tension style lugs and professional 850 series hardware. The Export series has become the standard of excellence by which all other drums in this category are judged. In fact, the Export series drums of today are more scientifically designed and better manufactured than most professional drums of only a few years ago. To further the continuum toward professional features and standards, Pearl introduces a hybrid Export line. The new Export "SX" series offers all of the same outstanding features as our standard Export series, plus many additional professional details and upgrades. Export "SX" drums essentially close the gap between semi-pro and professional series drum lines.
