

INTRODUCING

Prestige Session

Stunning semi-transparent lacquer finishes. The classic look of traditional double lugs. This is the all new Prestige Session Series from Pearl.

Over the years Prestige Session has been called the most acoustically intricate of all the Professional Series drums offered by Pearl. The basis for this can be found within its shell composition. Seven plies of hand selected birch and mahogany are formed by Pearl's heat compression shell molding process to produce an exacting air chamber. This unique blend of fine woods resonates in such a way as to bring out the best attributes of both. Mahogany provides warmth of tone reminiscent of maple while allowing the excellent high end attack and low end punch

of birch to remain aurally dominant.

To complement the sound of these outstanding drums we encase them with layer upon layer of beautiful high gloss lacquer. Available in a variety of semi-transparent and opaque colors, they have the glass-like appearance of fine furniture. Classic styled low-mass double lugs and newly designed badges complete the elegant visual of this fine instrument.

Pearl's new Integrated Suspension System is featured with all Prestige Session toms. The Integrated Suspension System holds each tom by the counter hoop thus removing all mounting hardware from the shell. This allows each drum to resonate fully, adding supreme

projection, clarity and lasting sustain. All Prestige Session toms and bass drums feature Remo® Clear Ambassador heads which provide excellent response and accentuates the natural tone inherent to this Series. A newly designed 6 1/2"x14" chrome snare drum has also been added to this Series offering excellent response, sensitivity and projection.

Many have called Prestige Session the best kept secret in Professional quality drums. Visit your local authorized Pearl Dealer and check out Prestige Session...with quality craftsmanship, grain revealing lacquer finishes and a host of exclusive features, it's safe to say Prestige Session won't be a secret much longer

Specifications
