PK-750

PK-600

SK-700

SD-50

Pearl's Student Model Educational Kits have gained a reputation as the standard by which all others are judged. They offer exceptional sound, supreme quality, and are designed for ease of use with the student in mind, all at an extremely affordable price. Our PK-750 and PK-600 Percussion Kits are perfect examples of what the industry has come to expect from a Pearl Educational Kit.

Both the PK-750 and PK-600 feature a set of 2 1/2 octave, satin chrome finished bells featuring durable plastic side frames that display the mounting instructions for easy assembly, time and time again. The bells rest on a ultra-sturdy height adjustable stand that features a quick on, quick off mounting function. For snare drum training, the stand also accepts our newly designed 8" plastic practice pad with foam stick surface. Also included with both the PK-750 and PK-600 are a music rack, mallets and a pair of Pearl drumsticks. The PK-750 kit comes complete with a slim-line injection molded hard case with form fitted internal compartments for the

ultimate in protection during transport. The case can be carried by either the formed handle or the included adjustable shoulder strap. The PK-600 offers the convenience of a heavy nylon reinforced backpack style carry bag.

For the snare drum student, there simply is no better choice than our new SK-700 Snare Kit. The SK-700 features a near professional quality ten lug steel shell snare drum, sturdy adjustable Pearl snare stand, and a "Gladstone" style rubber practice pad with raised center to teach accuracy. Our new heavy nylon carrying bag includes a separate compartment for the stand and an included pair of sticks, and its new square shape is much easier to transport and store.

Pearl's new SD-50 is an 8" foam rubber stick pad surface attached to our hard plastic base. The SD-50 provides an excellent way to start snare drum training by teaching accuracy and precision. Our fully adjustable stand is also included.

**PEARL GENUINE
ACCESSORIES**

The new SP2, 13" Sound Projector is designed specifically for Pearl's 13 inch FFX marching snare drum. Pearl's Sound Projectors offer improved focus and projection for marching snare drums and are easily attached with the provided Velcro tabs.

The May Comfort Core Cushions (MCC1) are our new marching carrier shoulder padding. They provide foam and air padding and were originally designed to withstand the demands of professional football. Standard on all of Pearl's Magnesium carriers, they are also available as an excellent accessory to any of Pearl's marching carriers.

The new FFSA carrier attachment is standard with all new Championship Marching Carriers. Designed to fit both the 13" and 14" FFX snare drums, replacing the clip brackets, the FFSA attaches on to two of the drum's tension posts with no direct shell contact.

FFX-103G 13" Marching Snare Drum

**CHAMPIONSHIP SERIES
SNARE & BASS DRUMS**

Pearl's Championship Series Free Floating FFX Snare Drums have been called the best sounding, most durable marching snare drums available today. Our newest addition, the 13" FFX-103G, provides yet another alternative in both sound and weight, without sacrificing any of the advanced features that have made this line so popular in the highly competitive world of Drum Corps.

At the heart of our 13" FFX-103G is a naturally aged, 100% Maple 6 ply shell, constructed by Pearl's Patented Heat Compression Shell Molding System. Our field proven free floating design utilizes aluminum alloy edge rings, super strong die-cast hoops and 10 oversized 6mm case hardened tension bolts to provide unmatched durability, even under the most extreme tuning requirements. Our silent Lightning Snare Throw-off unit offers a quick release function that allows fast snare head changes at the twist of the wrist with no small nuts, springs or washers to misplace. Fourteen individually tunable synthetic gut snares and six acoustically placed air vents provide unlimited fine tuning possibilities to optimize the excellent tone inherent to this outstanding snare drum.

At just 14.7 pounds, our FFX-103G is the perfect choice for competitive situations requiring a wide range of tunings, or for the smaller player where heavier weights become an important factor.

PBD-216N 14X16 Marching Bass Drum

Our Championship Series Marching Bass Drums combine unmatched quality and durability with a full bodied sound that many feel is the best in the industry at any price. This perfect combination is the reason why Pearl's Championship Series Marching Bass Drums are the choice of today's most competitive Marching Bands and Drum Corps. With the addition of our new PBD-216N 14"x16" bass drum, our Championship Series also has one of the largest selection of sizes ever offered.

As with all of our Championship Series drums, our bass drums feature a hand selected, 100% aged Maple shell formed by Pearl's patented Heat Compression Shell Molding Process. Extra-wide 2" high gloss black all Maple hoops, triple reinforced solid steel claw hooks and our aerospace quality aluminum casings ensure quick, accurate tuning, under even the most extreme tuning requirements. Four available color choices and its inherent higher voicing make the new PBD-216N a perfect choice for any bass drum line needing greater projection and a wider range of bass tones.

**CHAMPIONSHIP SERIES
CARRIERS**

MSG2

Pearl is once again pushing the envelope of technology with the addition of our new MSG-2 Magnesium Snare Drum Carrier. This state of the art carrier incorporates our new FFSA snare attachment and May Comfort Core Cushions (MCC1) for added shoulder support. Standard on all Magnesium Carriers for 1996, May Comfort Core Cushions are cutting edge technology using a foam and air padding system originally designed to withstand the rigorous demands of professional football. The MCC1 uses Velcro attachments to allow each player to place the cushions anywhere on the carrier shoulders, providing exceptional comfort.

Also new for '96 is the MCH1, Marching Cymbal/Hi-Hat Holder which allows snare drummers the ability to carry a ride/crash cymbal or a pair of hi-hat cymbals while marching, with no noticeable weight increase. The MCH1 easily attaches to the belly plate of the MSG2 Magnesium Snare Carrier (shown here), or our new MSC2 Aluminium Snare Carrier.

MVSC2

MVQC4

MVBC1

Mag-Vest Carriers

Also new for '96 is our complete line of Mag-Vest Marching Carriers. These hybrid carriers represent an incorporation of technology from both our Magnesium Carriers and traditional Vest carriers. The Mag-Vest offers the comfort of a fiberglass belly and chest section, and the durability of an all magnesium shoulder and back brace. These features give the carrier the feel of a Vest with the weight reduction and strength of a Magnesium carrier. By combining these outstanding features our new Mag-Vest just may be the ultimate marching carrier. Mag-Vest Carriers are available in Snare Drum (MVSC2), Quad (MVQC4), and Bass Drum (MVBC1) models.

MSC2

Aluminium Carriers

The new MSC2 Championship Series Aluminium Marching Carrier also features our new FFSA snare attachment and now incorporates J-rods for improved adjustability.

Exceptionally durable T-5 aircraft quality aluminum construction ensures years of dependability. There is simply no other aluminum marching carrier that offers the features of the MSC2, at anywhere near the price.

**CONCERT BASS DRUMS
& CONCERT TOMS**

Concert Toms

Concert Series Bass Drum w/ CBS35C stand

Pearl has expanded its outstanding concert percussion line with the introduction of our new Concert Series Bass Drums. Designed with the school budget in mind, our new Concert Series offers excellent quality at an extremely reasonable price. Our Concert Series Bass Drums are constructed with highly resonant wood-fiber shells and durable 1 3/4" high gloss wood-fiber hoops. New low mass split tension lugs maximize shell resonance, producing a full bodied tone, rich with outstanding volume, projection and lasting sustain. These superior features, combined with Remo Fiberskyn heads and Pearl's exclusive acoustical air vent system, produce the perfect combination of sound, quality and price. Concert Series Concert Bass Drums are available in four sizes, exclusively in #31 Jet Black.

Pearl Concert Toms offer a wide of range of tuning and performance possibilities equally suited to the percussionist in the concert hall, or on the field. Our 100% birch extended shells provide superb tone and projection, while new low mass tension lugs and 1.7mm steel hoops extend shell resonance and offer accurate fine tuning. Each pair of toms includes our sturdy T-855 double tom stand which provides independently adjustable tom arms, offering limitless positioning possibilities. Pearl Concert Toms are available in pairs or in sets of four, and are finished in a prestigious Matt Walnut stain.
